IZZAT MAMMADOV

FRONT-END DEVELOPER

+994 50 388 24 64 | imamedov388@gmail.com

SUMMARY

I'm especially specialized in React, Next.js and TypeScript. Throughout my career: I've created dynamic, interactive and innovative user interfaces in the React ecosystem. I've developed SEO-friendly, fast-loading and modern web applications with Next.js. I've increased code quality and created scalable projects using TypeScript. In the software development process, I aim to provide customized solutions to project needs by adopting modular structure, clean code principles and best practices. I'm prone to teamwork and adapting to new technologies is a source of motivation for me. As a developer who cares about user experience and is eager and talented in developing high-quality web applications, I'm here to add value to your projects.

EXPERIENCE

EA Camp School / Front-end Developer & Instructor   **Apr 2023 - Nov 2024**

I worked on a campus where I actively coded in React and Next.js while also teaching frontend programming to groups of students. I shared practical knowledge and insights through collaborative lessons, focusing on building modern and scalable web applications. My role involved both hands-on development

• Developing scalable web applications using React and Next.js
• Conducting group lessons and workshops on core frontend concepts
• Mentoring by reviewing their code and guiding them in project-based learning

EYTSOFT A.Ş / React Developer   **Mar 2022 - Jul 2024**

I contributing to projects by coding in React and supporting development tasks. I created utility functions to streamline workflows and improve code efficiency for other developers. Additionally, I shared my custom features and solutions with the team, fostering collaboration and enhancing overall productivity. My role focused on both coding and team-oriented problem-solving

• Writing and maintaining React components and application features
• Developing reusable utility functions to support other developers.
• Collaborating with the team to share solutions and optimize code efficiency

Freelancer / Next.JS & React Developer   **Mar 2022 - Aug 2023**

I worked as a freelancer, creating websites and solving issues for individuals and small businesses from different countries through various freelance platforms. I tailored web solutions based on client requirements, ensuring functionality and user-friendly design. My role involved analyzing problems, implementing fixes, and delivering custom websites.Developing frontend components for various projects

• Designing and developing customized websites based on client specifications
• Troubleshooting and resolving technical issues for existing websites
• To understand their needs and delivering tailored solutions

Developia Engineering Academy / **Intern Front-end Developer**   **Dec 2021 - Mar 2022**

I gained practical experience in web development, learning modern frontend technologies and tools. I had the opportunity to work on real-world projects, which helped me adapt to professional workflows and standards. This experience not only strengthened my technical abilities but also boosted my confidence in tackling frontend challenges

• Developing frontend components for various projects
• Participating in code reviews and implementing feedback
• Collaborating with the team to complete project tasks.

EDUCATION

Azerbaijan Cooperation University   **2016 – 2020**
Marketing and Management

Ankara University   **2021 – 2023**
Computer Science

SKILLS

HTML5 / CSS3 / SCSS / Bootstrap / JavaScript / jQuery / TypeScript / React.Js / Vite.Js / Next.Js / Tailwind CSS / Styled Components / Material UI / Redux Toolkit / Context API / Git / GitBash etc.
